

jessica claire 9 resumesampleexamplecom 555 4321000 montgomery street san francisco ca 94105 summary
highly motivated data professional experienced gathering processing analyzing relevant business data
with an advanced understanding statistical modelling machine learning analytical methodologies passionate
diligent significant experience leveraging machine learning cloud technologies solve business problems
skills r statistical programming data visualization data mining statistics statistical modelling
experimentation hypothesis testing python sql dashboard development pyspark cloud computing azure aws
education training bells university technology ogun 112020 bachelor science management science dissertation
management intelligence quantitative analysis decision support systems management certifications 1 microsoft
data scientist associate 2 microsoft azure ai engineer associate andela microsoft scholarship 2021 3 data
engineering nanodegree udacity 4 deep learning specialization deeplearningai experience avanade analyst
data science columbia sc 032023 current hiring managing qualitative researchers designing surveys data
collection tools analyzing behavioral data conducting randomized control trials ab tests statistical
modelling kbr data scientist point mugu ca 042022 022023 built segmentation algorithms marketing
optimization built deployed machine learning models flask api built internal web apps machine learning
applications sentiment analysis experimented forecasting algorithms deployed transformer models highly
efficient execution natural language processing tasks motion recruitment session lead python data
analysis oxnard ca 042022 012023 coached mentored 125 students python data analysis helped debug
solve technical challenges encountered students created pythonbased tutorials projects tech air data
analyst ventura ca 042021 032022 built ocr tool automate data extraction documents determining data
sources reports projects producing data driven publications using statistical modelling data
visualization collaborating internal stakeholders identify gather analytical requirements customer
product projects needs developed dashboard operations team enhance data mining management
analysis techniques designing engineering data gathering solutions surveys web scrapers omdena
junior machine learning engineer city state 112021 022022 identifying researching evaluating
relevant machine learning applications papers distilling details technical easy read reports
implementing state art architectures code codesigning method estimate depth water bodies bathymetry
using satellite imagery first marina limited project manager city state 062019 092019 collaborated
teams technicians execute chains activities large real estate project designed policies mitigate costs
due to foreseeable errors injuries loss materials delivering 20 budget forecasted scheduled monitored
project timelines personnel performance cost efficiency olayinka oyebola co data analyst consulting
intern city state 062014 102018 tracked analyzed reported findings business data completed audits
financial data 5 client accounts supervised data capturing project ecommerce giant ensuring completion
scheduled time hence 10 budget activities honors engineering project manager intern large construction
site class representative provided much needed organization digital learning virtual experiences 1
australian new zealand banking group built machine learning models linear regression decision trees
2 quantum consulting developed customer centric data science strategy using customer analytics
association mining 3 boston consulting group bcg gamma built customer churn models logistic regression
publications getting started computer vision microsoft azure published codex 2021 dolucodesmediumcom
websites portfolios profiles conferences workshops open data science conference west 2021 nvidia gpu
technology conference 2021 data science nigeria ai bootcamp 2021 afrotech conference 2021
